AI and Design Tool Use Disclosure

SWE 3409 Mobile Application Development, Individual Assignment 2

Student name	Arop Malual
Registration number	25/27389
Application name	AropPortfolio

1. Tools Used

ChatGPT

I used ChatGPT to assist me in understanding the assignment requirements, exploring solutions to development problems, and preparing explanations or documentation. I reviewed the suggestions and am responsible for the final work I submit.

Claude AI

I used Claude AI as an additional AI-assisted tool during the project. Its specific contributions were: debugging some code and explaining the errors made.

Figma

I used Figma to work on the application's UI/UX design, including screen layouts, visual organization, and design decisions.

2. Human Review and Responsibility

I am responsible for the final application, code, and documentation. I review the suggestions and generated content I use, redesign them according to my own preferences (styling, colours and layout), make sure I understand the submitted code, and test the application before submission.

3. Declaration

This disclosure describes the tools used during my project work. I will ensure that the information is accurate and complies with my lecturer's requirements concerning AI assistance and academic integrity.
